Aims

The PTT, NPTT method of teaching aims are the complete development of the child, ultimately preparing him/her for life's various experiences.

Children pass through sensitive period of development early in life. Doctors described the child mind between the time of birth and six year of age as the 'absorbent mind'. It is during this stage that a child has a tremendous ability to learn and assimilate from the world around him, without conscious efforts. During this time, children are particularly receptive to certain external stimuli the PTT, NPTT teachers recognizes and take advantage of these highly perceptive stages through the introduction of materials and activities which are specially designed to stimulate the intellect. Encouraged to focus attention on one particular quality, the child works at his/her own optimum level in an environment where beauty and orderliness are emphasized and appreciated. A spontaneous love of 'work' is revealed as the child is given the freedom (within boundaries) to make his/her own choices.
